

Extend Microsoft Office 365 to call the outside world

Simple, scalable landline and mobile calling for Microsoft Office 365

Today's workforce is increasingly mobile and requires innovative solutions to enable team collaboration and work effectively. CommsChoice Teams SIPConnect provides direct dialing capability from Microsoft Teams; integrating cost effective, quality PSTN calls with Microsoft's superior collaboration tools. Now your team can communicate using a single system - rather than using different collaboration tools for different calls.

Teams SIPConnect extends collaboration beyond the confines of your local network and in to the world beyond.

Enable immersive contact through chat, video and voice calls and conferencing to people inside and outside your organisation. Teams SIPConnect connects calls to landlines, mobiles or international destinations from a single, dedicated geographic number through Teams to anywhere in the world.

You can now truly deliver and manage your business communications from a single, integrated platform regardless of where you are.

Your hub for workplace collaboration tools

Transform the way you connect by combining CommsChoice Teams SIPConnect global voice and the best of Microsoft's cloud collaboration tools.

Communicate through chat, meetings, video and voice calls to anyone inside and outside your organisation.

Host audio and web conferences. Make calls to landlines, mobiles or international destinations from a single, dedicated geographic number from 6000 cities globally. Collaborate with ease, managing your business communications from a single, integrated platform regardless of your disparate locations.

Enabling the modern workplace

By 2025, Millennials will make up 75% of the global workforce. They're transforming the workplace into a digital one and studies suggest that they'll work where they want, when they want. Your workplace technology must constantly evolve to keep you in front, making work a thing you do, not a place you go.

Office 365 on its own is a powerful enabler, but extending it using CommsChoice Teams SIPConnect brings your world together.

Creating a future-proof technology strategy that addresses architecture, technology mix, security, supplier capability, delivery, adoption and budget can be overwhelming. There is an easier way.

We're here to simply your journey to the cloud.

Ditch the box

Forget about further investment in on-premise PABX or local SBC gateways to breathe life in to legacy systems. CommsChoice Teams SIPConnect for Microsoft Teams is a pure cloud solution; there's no need for costly remote hardware installations or firmware upgrades at every site so your infrastructure investment is protected.

Teams SIPConnect removes the complexity of managing a dedicated PABX and PSTN network. CommsChoice provides the link to Microsoft, so all you need is adequate internet bandwidth and appropriate Office 365 licensing.

Users are allocated a dedicated phone number that is linked to their Office 365 account and then your Teams account becomes your telephone. If that's not practical you can use a wide-variety of Teams-certified handsets.

And if you're married to your phone numbers, you can bring them along too. Number portability allows you to move existing numbers to your new system, or you can choose to allocate new ones.

Features

- › Simple pricing with PAYG or unlimited SIP rates, plus a per user fee
- › Office365 licensing remains with your Microsoft partner, unlike some providers
- › Experienced professional services team with Teams PowerShell expertise
- › Rapid, centralised mass deployment across multiple sites
- › Cost effective, highly available voice connectivity
- › Flexible agreements - scale up (or down) as required
- › Each user has a dedicated phone number (DID) linked to Office 365
- › Number portability
- › DID number availability in 6,000 cities globally
- › 24/7 support by engineers
- › Proactive network monitoring

We'll hold your hand

At every stage of your journey to the cloud from consulting, design, deployment, management, support and beyond we'll be there.

Integrate with CommsChoice Global PBX

Extend your collaboration capabilities to include more sophisticated functionality such as advanced routing, reporting and analytics, auto attendant and call centre ACD - all in the cloud using CommsChoice Global PBX.

Leverage the benefits of true mobility, collaboration and simplicity on one single, integrated platform across all your office locations. Experience the power of a unified workspace.

Building your solution is as simple as 1, 2, 3 (and 4!)

Select or upgrade your Office 365 licence - available through your chosen Microsoft partner.

Choose your CommsChoice Teams SIPConnect plan.

Identify your desired CommsChoice deskphone (or maintain existing hardware).

CommsChoice onboarding managers deliver our agreed solution, deploying quickly and effectively.
